

FILTER & PURIFIER

LIFETIME / MAINTENANCE-FREE

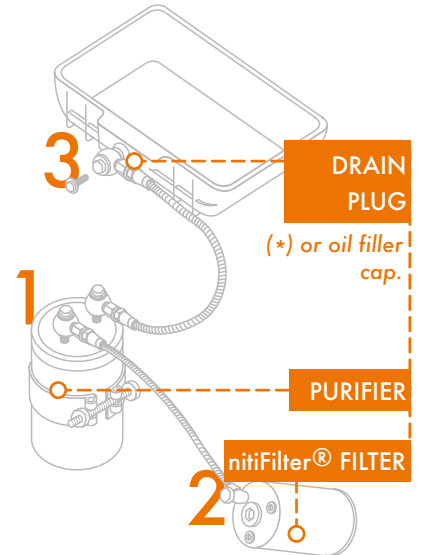

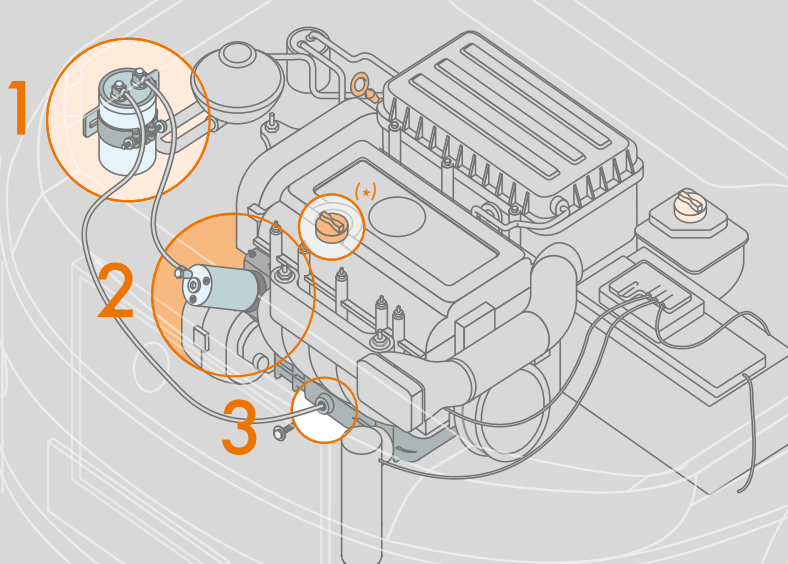

The NITIFILTER® is an innovative, maintenance-free lifetime (SELF-CLEANING) filtration system that extends drain intervals.

The OPTIMAL QUALITY of its filtration means the oil stays clean and guarantees better lubrication, better performances, less engine wear and increased protection in case of engine damage.

Based on a TECHNOLOGY inspired from the Marine industry and as a result of many years of research and prototyping, nitiFilter® is entirely built and assembled in FRANCE.

It is designed to ensure optimal filtration and maximum COST SAVINGS.

ENGINE PROTECTION

100% FILTERED OIL
LESS ENGINE WEAR

SAVINGS

6 X LESS OIL CHANGES
LESS MAINTENANCE AND DOWNTIME

INNOVATION

STAINLESS STEEL
WOVEN CLOTH & **ALUMINIUM** HOUSING

ENVIRONMENT-FRIENDLY

10 X LESS OIL USED

10 X LESS CO²

XTREME FILTRATION PERFORMANCE

Founded in **2007**, **XFP** (XTREME FILTRATION PERFORMANCE) is a company that specializes in cutting-edge automotive filtration. **SUSTAINABLE DEVELOPMENT**, including natural resources conservation, is at the heart of our concerns. Conscious of the waste and the disastrous environmental impact of traditional automotive filtration, XFP developed and patented a new engine oil filtration system designed to dramatically **REDUCE OIL CONSUMPTION** and polluted waste.

Inspired by a technology that has proven itself in the marine market and as a result of many years of **RESEARCH**, **NITIFILTER®** is now the first self-cleaning lifetime oil filter that replaces your regular oil filter. XFP builds and assembles all their products near **PARIS**, in Poissy, the historical car industry area.

The **ISO 14001 CERTIFICATION** obtained in 2017 confirms the industrial strategy implemented.

OUR CLIENT ARE CONVINCED

« Motor oil and filtration costs disappear. We saved more than 5 oil changes on most of our trucks.
We are more than cost-effective. »

« Oil drain frequency has been reduced from one every 500 hours to one drain every 1 500 to 2 000 hours. Overall, it means we use and recycle less oil (because recycling costs money too!) and we need less staff members to do the work.
I definitely recommend this product.
Since 2010, we only see benefits. »
